

ENTERPRISE RESOURCE MANAGEMENT

1. Core Modules

1. Customer Management

- Customer database (schools, companies, hospitals, individuals)
- Contact details & contracts
- Order history & preferences

2. Product Catalog

- Uniform types (school, corporate, hospital, military, etc.)
- Size charts (standard + custom)
- Fabric library (colors, materials, patterns)
- Embroidery/branding options (logos, name tags)

3. Order Management

- Quotation requests & approvals
- Order entry (bulk & individual)
- Measurement capture (per person / bulk sizing charts)
- Order tracking (pending → cutting → stitching → QC → delivery)

4. Production Management

- Cutting & stitching job assignments
- Tailor workload tracking
- Work-in-progress dashboard

5. Inventory Management

- Raw materials (fabrics, threads, buttons, zippers, branding items)
- Finished goods (stock uniforms for standard sizes)
- Automatic stock deduction when orders are confirmed
- Low stock alerts

6. Supply Chain & Procurement

- Supplier database
- Purchase orders for fabrics & trims
- Supplier delivery tracking

7. Finance & Billing

- Quotations & invoices (GST/VAT ready if needed)
- Payment tracking (advance, installments, balance)

- Expense tracking (fabric, tailoring, utilities)
- Profitability reports per order

8. Human Resources (Tailors & Staff)

- Tailor database (skills, efficiency, pay rates)
- Attendance & payroll
- Job allocation & performance monitoring

9. Reports & Analytics

- Sales reports (by client, category, period)
- Production efficiency reports
- Inventory usage reports
- Profit/loss analysis

2. Workflow Example (End-to-End)

1. Client places an order (e.g., 500 school uniforms).
2. ERP generates a quotation → client approves → order confirmed.
3. Measurements uploaded (bulk size chart for each class/student).
4. ERP checks fabric stock → triggers purchase order if shortage.

5. Cutting & stitching jobs assigned to tailors → progress tracked.
6. Quality check before delivery.
7. Invoice generated & sent → client makes payment.
8. Delivery scheduled → customer notified.
9. Order archived with full history for repeat business.
